[01 / VIBE CODER & CLAUDE AI AUTOMATOR]

Moving ideas from rough concepts into reliable, working systems.

Full-stack developer with extensive daily expertise in **Claude Code, multimodal AI APIs, Supabase (Postgres + RLS), and event-driven automations**. Built for teams that need to turn product briefs into shipped software and automated business workflows with speed and judgment.

Case Studies & Shipped Systems

Actual snapshots and notable features across AI-native products, browser engines, and operations automations.

CheerCPT: Multimodal Athletic Video Analysis & AI Coaching Platform

An asynchronous computer vision and multimodal LLM platform that allows cheer athletes and coaches to upload practice clips and receive instant, objective technique diagnostics, angle corrections, and routine scorecards.

NOTABLE FEATURES & CAPABILITIES

✦ Instant Technique Diagnostics

Automatically detects tumbling skills, analyzes body angles, and prioritizes actionable athletic corrections.

✦ Anti-Hallucination Abstention

Engineered safe abstention handling (drops to "unable_to_assess" state) if camera angle or video clarity is insufficient.

✦ Sensitive Athlete Privacy

Strict owner-or-admin data access controls protecting private youth athlete training footage from exposure.

✦ Interactive Coach Scorecard

Granular review portal with feedback loops (helpful, partly helpful, missed issue) to continuously refine outputs.

✦ Resumable Mobile Video Uploads

Handles large high-definition practice video clips directly from phones without browser timeouts or memory bottlenecks.

✦ 250+ Turn Claude Code Pair Build

Rapidly shaped from an ambiguous concept into a working system with full schema migrations, route handlers, and blueprints.

1

WHAT THIS WEBSITE SELLS

CheerCPT sells an AI-powered service for analyzing, scoring, and providing real-time feedback on cheer routines.

2

NOTABLE FEATURES & CAPABILITIES

✦ In-Browser Chrome Side Panel

Manifest V3 browser client that audits active web pages directly inside a persistent side panel without switching tabs.

✦ Real-Time DOM Signal Extraction

Automatically scrapes hero copy, CTAs, pricing tiers, FAQs, and testimonials from any live URL.

✦ Strategic Revenue Leak Audits

Identifies value proposition gaps, audience mismatches, compliance risks, and generates prioritized next steps.

✦ Model Context Protocol (MCP)

Equipped with custom MCP tools enabling agentic AI workflows to inspect, analyze, and generate site documentation.

✦ Stripe Tier Subscription Gates

Automated subscription tier gating verifying customer status before unlocking deep multi-page audit runs.

✦ Transactional Email Delivery

Integrated Amazon SES for instant automated delivery of compiled audit reports to stakeholder inboxes.

INTERNAL TOOLS

ENTERPRISE OPS

Coach Operating System: Automated Risk & Retention Engine

An automated operations hub that replaces manual student tracking spreadsheets with a 15-minute background risk engine that detects at-risk students and automatically dispatches prioritized action tasks into coaches' queues.

NOTABLE FEATURES & CAPABILITIES

✦ 15-Minute Scheduled Churn Engine

Automated edge function evaluates student activity metrics every 15 minutes to flag disengaged learners immediately.

✦ Intelligent Alert Deduplication

Prevents alert spam and coach overwhelm by checking for active open alerts before generating new notifications.

✦ Unified Coach Task Queue

Integrated inbox allowing coaches to mark tasks done, snooze alerts for 24h, or log private case notes.

✦ Student 360 Analytics CRM

Single-pane view combining engagement velocity, streak history, lesson completion, and scheduled session status.

✦ Cohort-Isolated Access Controls

✦ Materialized Risk Views

Granular permissions ensuring coaches only access assigned students, while admins maintain high-level reporting.

High-performance database views refreshing automatically to keep coach dashboards fast under heavy data loads.

SAAS PLATFORM

EMAIL AUTOMATION

DATA MIGRATION

PRODUCTION READY

Sienvi Nexus & Automated Cloud Data Migration

Multi-workspace project management platform featuring event-driven email delivery, paired with custom automation scripts for extracting and synchronizing nested SaaS folders into Google Drive.

NOTABLE FEATURES & CAPABILITIES

✦ Multi-Workspace Data Isolation

Enforces complete workspace isolation so multiple agency clients collaborate without data cross-leakage.

✦ Event-Driven Email Dispatches

Real-time transactional emails via Amazon SES whenever tasks are assigned, commented on, or completed.

✦ Real-Time Security Audit Logs

Immutable activity logs capturing all task updates, file uploads, and team member role modifications.

✦ Automated Basecamp-to-Drive Migration

Custom Python ETL pipeline navigating nested Basecamp folders, parsing metadata, and creating mirrored Drive hierarchies.

✦ Workspace-Scoped Cloud Storage

Secure cloud media buckets allowing team members to store and preview design

✦ Resilient API Error Handling

Engineered with rate-limiting resilience, retry backoffs, and strict typing across API

assets securely.

[03 / CAPABILITIES]

Core Competencies & Toolkit

Tools, frameworks, and patterns used to move from rough concept to finished solution.

AI ORCHESTRATION

AI & Agent Tooling

- Claude Code (Opus / Sonnet)
- Model Context Protocol (MCP)
- Google Gemini File & Video API
- Structured Outputs & Guardrails
- Prompt Engineering & Evaluation

MODERN DEVELOPMENT

Full-Stack Platforms

- Next.js 16 (App Router) & React 19
- TypeScript & JavaScript
- Chrome Extensions (Manifest V3)
- Tailwind CSS & Shadcn UI
- Node.js & Express Microservices

DATA & PERMISSIONS

Databases & Backend

- Supabase & PostgreSQL
- Row-Level Security (RLS) Policies

BUSINESS AUTOMATION

Automations & Integrations

- Amazon Simple Email Service (SES)
- Stripe Subscriptions & Webhooks

- Database Triggers & Materialized Views
- Python 3 (ETL, Webscraping, APIs)
- Supabase Edge Functions

- Google Cloud Storage Resumable API
- Google Drive & Workspace REST APIs
- 15-Minute Cron Automation Engines

[READY TO COLLABORATE]

Let's build something extraordinary.

Have an idea that needs to move from concept to working execution? I combine deep Claude pairing, fast vibe-coding, and reliable systems engineering.
