Routine review for competitive cheer

## Review the routine. Choose the next correction.

Upload a routine and receive a scorecard aligned to IASF and USASF standards, with notes tied to specific moments in the video.

[Analyze your routine →](#)

## Technical Capabilities & Stack

Core competencies spanning AI engineering, full-stack systems, and cloud infrastructure.

### AI SYSTEMS & AUTOMATION

#### AI & Agent Tooling

- Claude Code (Opus & Sonnet workflows)
- Google Gemini Multimodal Video API
- Model Context Protocol (MCP) tool integration
- Autonomous Agent Prompts & Eval Pipelines
- Motion tracking & computer vision analytics

### FULL-STACK DEVELOPMENT

#### Modern Web & Apps

- Next.js 16 (App Router) & React 19
- TypeScript & JavaScript (ESNext)
- Chrome Extensions (Manifest V3)
- Node.js & Express Microservices
- Tailwind CSS, Shadcn UI & Vite

## DATA & MACHINE LEARNING

### Data Science & Python

- Python 3 (ETL, Automation, Scripting)
- PyTorch & TensorFlow deep learning models
- OpenCV video processing & frame analysis
- Pandas, NumPy, Matplotlib & SciKit-Learn
- Selenium & Playwright Web Scraping

## CLOUD & INFRASTRUCTURE

### Databases & DevOps

- Supabase (PostgreSQL, Triggers, Views)
- Row-Level Security (RLS) & Auth Gates
- Amazon Simple Email Service (SES)
- Google Cloud Platform (GCP) & Firebase
- Docker, Git & GitHub Actions CI/CD

**Let's turn ideas into practical,  
working systems.**

Available for full-stack engineering and AI automation roles.  
Comfortable taking rough concepts and shaping them into clear  
plans, working prototypes, and reliable finished products.
